Second Economic Impact Survey

Sept-09

Expectation, for the next three months, of change in staff numbers

From this pie chart we can see that 21% of architects offices expect that staff numbers will decrease in the coming three months.

If linked to decreases reported in the previous slide, we can see that optimism about a recovery for the sector is still low but things are improving.

Conclusions:

- Important to continue to repeat the survey every 3 months
- The architectural profession continues to be badly affected by the economic downturn
- The opinions expressed and shown in this presentation indicate that the situation for the architectural profession has not worsened in the three months from June to September 2009
- In fact there is more optimism as the year progresses but, given the time lag for effects to filter through the sector, it may be that the worst is still ahead
