The Coordinating Council reached the conclusion to make maximum efforts and continue to work for the success of the UIA Congress, the UIA General Assembly and the Council Meetings in Tokyo as scheduled on September 25th through October 1st , 2011 under the pressing primary Congress' theme :

Design 2050

Beyond Disasters, through Solidarity, towards Sustainability

Next September the participants will talk, transmit, discuss together according to *Environment, Culture, Life*, the sub-themes being deeply related to the *Human Security*. They will examine together images of urban, architectural and living environment towards and beyond 2050.

Thereby, a firm solidarity of our professional community will be encouraged to work for the equity for all, beyond the boundaries of nations and regions, and beyond any kind of discrimination. The architects of the world will support with the UIA the affected people and areas and propose what architects should do now and in the future within the global context.
