BF: It's a firm created to develop projects in the fields of architecture, urban design, and landscape and planning.

BF: Designs solutions are the result of a careful analysis, which embraces economic viability, environmental issues and cultural interests. Based on intensive collaboration teamwork that fasters individual abilities, BF: sets up cross-discipline teams which developed ideas, concepts and strategies to cater for the increasingly sophisticated needs of our clients.

Technological innovations and the rapidly changing world reinforce our commitment with the production of projects that not only meet present requirements but are also capable of adapting to the future.

Thus, our practice establishes a sympathetic relationship between men, their context and culture. While fulfilling diverse programmatic requirements, and work scales, BF: attempts to come up to our clients expectations. Our practice embraces all project stages, from preliminary drafts until its materialization. To meet our will of linking the conception with the execution, a project management team works alongside to turn our ideas into a reality.

Architects Daniel Becker and Claudio Ferrari have worked together for almost 30 years, leading professional associations with other partnerships. Throughout these years the team has obtained several professional assignments and received awards in several competitions as well as recognitions in many countries. Some of the most distinguished recognitions involved are: the Hotel Opul in Las Vegas, the Master Plan for Lost City, in West Wendover, Nevada, The Master Plan for the Chacarita, Agronomy and Paternal Area, City of Buenos Aires, the project by the Riachuelo Coast, having as client the Government of Buenos Aires City. The Master Plan for the Vicente Lopez Ribera, the Bicentenary Museum also known as the Ex-Aduana de Taylor of Buenos Aires. In addition, the team has also worked on collective houses, and obtained both national and international awards such as the First prize for the Master Plan in the area of Retiro, in Buenos Aires, The First Prize for the Memorial Park in University City, Buenos Aires, First Prize for the Mendoza Central Park, First Prize for "Centro Cultural del Bicentenario" after submitting an entry in the International Architecture & Urbanism Competition, and the First Prize for the corporate office of "Central Mail of Argentina".

All together, the individual experiences of the Senior Partners result in a solid experience team thanks to the works, projects, and national and international awards, worth mentioning:

The Vitruvio Award of the New Generation of Architects, the First Prize in the Buenos Aires International Biennial (1995), the golden medal in the Miami Beach Biennial (2003); the Mendoza Central Park opened to the public in 2004 (First Prize in the competition of projects); the first prize in the "Centro Cultural del Bicentenario", newly opened in June 2015.

The Master Plan of University City and Memory Park, First Prize in the Retiro Competition. Second Prize in the International Duxton Plain Housing Competition (2002, Singapore), Third Prize in the national competition of The Institute of Physiology, Biology Molecular and Neuroscience, First Mention in the national contest of "Consejo de la Magistratura de la Nacion".

BF has also been recognized with a First Mention in the Majestic- AFIP competition to convert and refurbish a historic building downtown Buenos Aires, Second Prize in the competition for the new headquarters for the Ministry of Science and Technology and the Conicet in the area of the former Bodegas Giol, and Finalist in the International Competition for the Gabriela Mistral Cultural Center in Santiago de Chile.

In the year 2013, BF has been awarded with three first prizes in the biennale of Architecture of the University of Buenos Aires and has been prized recently in the Ranking Professional Excellence Award 2014 – ARQ-CLARIN – Argentina.

In 2015, the Mendoza Central Park won a Prize in National Sustainable Architecture Award 2015 Category Urban Planning built.
