

TMG Consultants GmbH is one of the leading consulting companies for the manufacturing industry. For more than 35 years, TMG Consultants has consistently focused on supporting industrial companies in overcoming complex management challenges and improving their performance and competitiveness. The main focus of the consulting services is on customized efficiency improvement programs - especially in the areas of SCM and production - and their implementation. In essence, this means: Optimizing processes across the board, sustainably increasing corporate performance, and efficiently and purposefully supporting the implementation of the measures required to achieve this.

The customer base includes large medium-sized companies and industrial groups. Core industries are the automotive and supplier industry, their service providers as well as mechanical and plant engineering. TMG Consultants is headquartered in Stuttgart. In addition to a subsidiary in Romania, for the Eastern European market, there is a network of international experts and numerous project locations around the world. The establishment of a new production plant usually does not run as smoothly as desired. A functioning network of experienced specialists is required to ensure smooth success - this is where we need you. We are looking for support as soon as possible as:

## **Coordination architect for factory planning and logistics buildings**

### **YOUR TASKS**

You will independently develop solutions for our customers in a young and motivated team and support our factory planning division on its growth course with your expertise.

Here you support us:

- As an experienced architect, you will develop construction concepts for our globally operating industrial customers, from design planning and implementation planning to site supervision and support.
- As a specialist for structural engineering solutions for production and logistics real estate, you are also proficient in integrating other planning disciplines into the planning process.
- As part of a team, you develop pragmatic and innovative solutions and present the results to the client.
- As a competent contact person and expert in factory planning, you are able to quickly grasp even complex interrelationships and present them to the customer transparently and confidently
- With the help of your experience and social competence, you are able to convince the customer of your solutions and to bring about the necessary decisions.
- You take on (partial) project responsibility and support the future-oriented development of our factory planning competence.

As an architect, you will spend part of your working time at the customer's site or coordinating our planning team in the office - however, the pandemic has also shown that many topics can now be dealt with from the home office.

**YOUR PROFILE**

Your qualities, experience and qualifications

- between 5-10 years of professional experience in the field of planning and realization of complex industrial/logistics real estate is advantageous
- Technical master's degree, architecture degree or MBA in the field of architecture/building planning
- Organizational ability and experience in coordinating planning teams
- High level of problem-solving skills combined with healthy pragmatism
- Self-confidence, above-average commitment, and enthusiasm
- High social competence, ability to work in a team, pleasure in dealing and cooperating with clients and colleagues
- Strong communication skills in English, German knowledge is an advantage
- Good project management and organizational skills
- MS-Office, MS-Project and CAD skills

**YOUR BENEFITS**

- Exciting, challenging projects as well as the opportunity to drive things forward
- Continuous further development
- Modern working environment with a lot of creative freedom in a young and motivated team
- Travel and working hours can be arranged as flexibly as possible
- Attractive compensation package (salary, bonuses, insurance package)
- Work-life balance
